

## The “C” Button – Chiropractic Specific Data

This feature allows you to add data that is specific to chiropractic claims for billing. There are only a few States that require this information to be transmitted.

The screenshot shows a software window titled "Chiropractic Specific Data". At the top right of the window is a navigation bar with buttons labeled "1", "2", "I", "H", "C", "M", "P", and "A". The "C" button is highlighted in red. Below the navigation bar, the form contains several fields: "Nature of Condition:" with a search icon and a text input field; "Acute Manifestation Date" with a date picker showing " / /" and a dropdown arrow; "Level of Subluxation" with a text input field; "Number In Series" with a text input field; "Treatment Months" with a text input field; "Complication Indicator" with a checkbox; and "Symptoms Description:" with a large text area and a vertical scrollbar.

The fields here are easily marked for your application.

When filling in the **Symptoms Descriptions**, please do not use any type characters other than alpha characters, or numeric characters. Never use any punctuation in this field and **DO NOT HIT** the hard return key (ENTER)! Use your space key.
